## STRAITLINE COMPONENTS

### AVID ELIXIR UPGRADE LEVER COMPATABILITY BULLETIN

---

This document is intended to inform the user of our Elixir upgrade lever compatibility between the many Elixir models.

Elixir Levers are available in 3 main models, the Elixir5, ElixirR & Elixir CR. The Elixir 5 comes only with an aluminum blade, the ElixirR & Elixir CR are both available with the option of an aluminum lever blade or carbon fiber lever blade.

Straitlines upgrade levers, are a direct replacement for the ElixirR & ElixirCR levers with aluminum blades only, however cross compatibility with the other listed models can be achieved by purchasing certain parts from Avid through your local dealer. *Use chart below to determine what parts you will require.*

Lever Model	Avid Parts Required	Description
Elixir5	11.5015.028.000	Elixir Lever Pushrod/Coupling Kit
ElixirR & CR (Aluminum Blade)	NO PARTS REQUIRED	
ElixirR & CR (Carbon Blade)	11.5015.028.000, 11.5015.023.000	Elixir Lever Pushrod/Coupling Kit, Elixir Lever Service Kit.

**Notes:**

- 1) Parts listed will adapt 1 lever so you will need to order 2 of each required part number to adapt 1 pair of levers.
- 2) The Elixir Lever Service Kit P/N: 11.5015.023.000, comes with a number of items. You will only need the plastic flanged bushings in this kit. Keep all other components as you will eventually need them to do a complete rebuild on your brake levers.
