DIRT top 100 Edition!

It pretty much explains itself... DIRT selected our Ultra 50 and it is truly a honor!

“Straitline Components Direct Mount Stem

A few years ago we had little to no choice when it came to direct mount stems. Now most companies offer a direct mount option, which is the best set-up for Serious downhill riding, further stiffening the control and preventing stem twist in those little spills. We chose the Straitline stem for a few simple reasons; it is clean, simple, light and aesthetically pleasing, with a range of colours options.

Note too that this stem is also available in super short 28mm (BoXXer mount only) as well as the standard 50mm.”

**STRAITLINE COMPONENTS
DIRECT MOUNT STEM**

A few years ago we had little to no choice when it came to direct mount stems. Now most companies offer a direct mount option, which is the best setup for serious downhill riding, further offering the control and preventing stem twist in those little spots. We chose the Straitline stem for a few simple reasons. It is clean, simple, light and aesthetically pleasing, with a range of colour options. Here too that this stem is also available in super short 28mm (Buckeye mount only) as well as the standard 50mm.
